

Emory University

The 704-acre campus is in a beautifully wooded area six miles northeast of downtown Atlanta. Emory University, recognized internationally for its outstanding liberal arts colleges, graduate and professional schools, and one of the Southeast's leading health care systems, is located on a beautiful, leafy campus. Emory maintains an uncommon balance for an institution of its standing: our scholars and experts generate more than \$521 million in research funding annually, while also maintaining a traditional emphasis on teaching. The university is enriched by the legacy and energy of Atlanta, and by collaboration among its schools, centers and partners.

Atlanta

The city of Atlanta populated by about 5 million people and widely considered the cultural and industrial center of the Southeast, offers a host of diverse opportunities. The Jimmy Carter Presidential Center and Library and the Martin Luther King, Jr. Center for Non-Violent Social Change are both internationally known educational service facilities. Culturally, Atlanta offers the Atlanta Ballet, the Atlanta Symphony Orchestra, the Alliance Theater, the High Museum of Art, and the Michael C. Carlos Museum on the Emory campus. The Atlanta Botanical Gardens, Zoo Atlanta, and the Georgia Aquarium are also located in the city.
