

Charles E. Wood

Department of Geology

Indiana University

Directory and News Letter No. 11

Ralph E. Esarey, Editor

Bloomington, Indiana
November, 1963

John B. Patton,
Chairman

To our alumni:

We thought these special items should be included with the directory at this time. An issue of the alumni news will be forthcoming in a few months. Please drop me a card or letter with news about yourself or any happenings that might be interesting to the Department or the alumni. Also, please send in all corrections to the directory that you can make. There must be many changes of address about which we have received no notice.

Editor

DR. J. J. GALLOWAY

Doctor J. J. Galloway, internationally known for his contributions to paleontologic knowledge, died suddenly of a heart seizure in his Bloomington home on April 10, 1962. Immediate survivors are his daughter, Mrs. P. Priscilla Sgro, and his beloved grandson, Master Joseph Sgro.

Born on a farm near Cromwell in Noble County, Indiana, on August 23, 1882, Doctor Galloway majored in geology at Indiana University where he received the Bachelor of Arts (1909), Master of Arts (1911), and Doctor of Philosophy (1913) degrees. Doctor Galloway was the first person to receive the latter degree from the Indiana University Department of Geology and became one of the Department's most distinguished graduates. As a student he was a member of the University's track team and also participated enthusiastically in dramatics.

Doctor Galloway devoted his professional life almost exclusively to teaching and research. He served as an Instructor in the Indiana University Department of Geology from 1913 to 1916. From 1916 to 1931 he was associated with the Department of Geology at Columbia University where he rose from his initial appointment as Curator of Paleontology to Associate Professor of Paleontology. Doctor Galloway rejoined the Indiana University faculty in 1931 as Professor of Geology and Paleontology. On his retirement in 1953, Indiana University bestowed on him the title Professor Emeritus of Geology and Paleontology.

(Taken from a memorial resolution by T. G. Perry, John B. Patton, and Paul E. Thompson)

DEISS MEMORIAL FUND

The Charles F. Deiss Memorial Fund is building up slowly. Dr. Deiss made a notable contribution to the Department of Geology and the Geological Survey through his leadership and administration. No single person contributed as much as he did toward obtaining the new buildings for the Department and the Survey.

The University Foundation handles the fund which is utilized to help worthy students. During the summers of 1960, 1961, 1962, and 1963, tuition scholarships have been awarded to aid good undergraduate students attending the Indiana University Geologic Field Station in Montana. At the suggestion of Mrs. Deiss, the tuition scholarships, awarded to the best Indiana University geology students since 1960, were extended to eligible students from Montana State University, where Dr. Deiss taught for 17 years. Montana State, by contract, sends its geology majors to our Field Station. Award winners since the scholarship system was initiated have been: 1960, Edward Berg and Gerald Johnson; 1961, Roger Cuffey and Thomas Walker; 1962, Gary Kochert; and Donald Eckerty in 1963.

OWEN MEMORIAL ROOM

Kenneth D. Owen, consulting geologist of Houston, Texas, and New Harmony, Indiana, a member of the illustrious Owen Family which contributed so much to the geology of Indiana and the Middle West, has furnished and decorated, personally, the Owen Memorial Room as a faculty lounge and departmental reception room in the new building. This is one of the most beautiful and elaborately decorated lounges on the campus. It has an Early American theme carried out with actual antique furniture from that period, such as would have been found in the better homes in New Harmony in the early "eighteen hundreds". This is an outstanding show place on the campus, worth a trip to see. In the very near future we hope to dedicate the lounge as an acknowledgement of this contribution to the Geology Department and the University by the Owen Family.

NEW FACULTY MEMBER

Dr. Paul Edwin Potter joined our faculty last January as Associate Professor of Geology to teach and work in the general fields of sedimentation and sedimentary rocks. Dr. Potter has distinguished himself in this field, having published some 30 papers and two books. Much of his work was done while a member of the Illinois Geological Survey during the years from 1952 to 1961.

Dr. Potter was born in 1925 in southwestern Ohio and grew up in and around the city of Cincinnati. He attended the University of Cincinnati from 1943 to 1945 and then spent two years in the Armed Forces. The years 1946 to 1952 were spent at the University of Chicago where he obtained his PhD degree in 1952.

At the Illinois Survey, Paul was research assistant to Dr. M. M. Leighton in Pleistocene geology and later became associate geologist in the coal section. Research was carried on in the fields of sedimentation, sedimentary petrology, and subsurface stratigraphy, involving mostly Pennsylvanian and Mississippian rocks. In cooperation with Dr. F. J. Pettijohn, he published the two recent books, "Paleocurrents and Basin Analysis" and "Atlas and Glossary of Primary Sedimentary Structures". In addition, Paul was a Senior Post Doctoral Fellow in NSF at the University of Illinois (1957-58) and a Guggenheim Fellow at Johns Hopkins University from 1961 to 1962. With all this, Paul found time to get a Master's Degree from the University of Illinois while studying statistics. Dr. Potter has acquired a national reputation, and his addition to our faculty will strengthen materially the Departmental offerings in this important field of geology.

NEW FIELD OF GEOLOGY WITH A NEW MEMBER OF THE
DEPARTMENT IN CHARGE

Our newest expansion of geological fields is a graduate program in Hydrogeology, which began this year with three doctoral fellowships (three years each) supported by the U. S. Office of Education under terms of the National Defense Education Act. Let our newest faculty member, Professor Allen F. Agnew, who is in charge of this program, speak for himself. (He didn't know this would be published. I requested an auto-biography and this is what I got.)

To: Ralph Esarey

From: Allen F. Agnew

Born in a small town in east-central Illinois, son of a country doctor, saw the light of day in 1918 in Ogden. Did the usual in grade school and high school, ending up valedictorian (small class) at graduation, with letters in track, basketball, and baseball (actually didn't get the letters in track - too slow - or baseball - it wasn't accepted there as a letter sport; let's face it, wasn't good enough).

Spent four years at University of Illinois, getting A.B. in Geology. Not smart enough for a scholarship, so had to work my way through; this wasn't as bad as you think, because I lived at home, 18 miles away and commuted. Worked first for History of Education Prof., then as a Junior the Illinois Survey took pity on me (I stayed with them till 1942, when I got my M.S. at Illinois).

Was research assistant in micropaleo at Illinois Survey, and when they tired of me they transferred me to the Coal Division, where I sat on oil wells in the Illinois Basin, logging coals; also prepared structure maps and stratigraphic cross sections of the Pennsylvanian.

In 1942 joined the USGS to begin their project in the Upper Mississippi Valley lead-zinc district, where several geologists working under me developed a detailed stratigraphic breakdown that enabled us to work out the extremely subtle folds and faults that controlled the ore bodies, and I got the credit. Ranged across the Ordovician outcrop from southeastern Minnesota to south-central Wisconsin, and southward into Iowa and Illinois.

Spent a year and a half at the Iowa Geological Survey, trying to convince them that I knew something about the Ordovician in that state, for the Ground Water Division of the USGS.

Went to Stanford for two years, ending up with the Ph.D., but not until I had substituted for their summer field course a couple of months for the USGS in Death Valley with a newly-wedded wife (mine; I was a newly wed, too).

(Continuation of Agnew auto-biography)

Taught a year at the University of Alabama, showing the usual wide range of competence (?) required of teachers in small departments, by handling micropaleo, structure, engineering, and subsurface.

Back to the USGS and the Wisconsin lead-zinc district to re-activate that project, as the Nation was again warring and needed brass and batteries.

Then, following Horace Greely again, we wended westward where we were welcomed with warmth within the faculty of the University of South Dakota. After learning much about the state and the people, and learning to admire both, we took refuge in the East (eastern Middle West, that is), leaving the hard-working post of State Geologist for the easy life of a professor at Indiana University.

Along the line acquired a wife, 4 children, several old cars (one by one -- children, too, despite what you have heard of South Dakota because of Aberdeen), too many books and files, and gray hair (less of it, too). Charley horses whenever I play baseball anymore, eye-glasses whenever I read or do other things, and "pre-tendicitis" when asked to do anything around the house.

My Mother still lives at Ogden, 120 miles away (as does one of my sisters and her family), and my wife's parents live at West York, Illinois, 80 miles west of Bloomington, so I have to mind my P's and Q's. This is not hard to do, tho, listening to my wife sing (she's a professional), my kids play the various instruments, while I sit and beam. This activity is very broadening (of beam) for me. And it is enjoyable, too. As I hope this has been for you.
