 Credit given for only one of the following: BIOL-L 211 or S 211

The structure of the above class is blended/flipped relative that of a traditional class. Students are expected to invest time during the week watching lecture videos [~ 2-3 hours], completing the assigned readings, starting to learn new vocabulary and complete pre-class assignments [~ 2 -3 hours] before coming to class. Submissions that will be required at regular intervals during the week (example Monday lecture assignment, Wednesday Lecture assignment) before class meets on Friday. Seek out assistance immediately when you need it during the week. Friday classes are active learning classes where students will engage in collaborative, active, and inquiry-based activities. These are designed to deepen understanding of course topics, practice disciplinary thinking and apply the material of the week to real world scenarios (drug design, scientific methods, and experimental strategies). Students are expected to come to class prepared and ready to engage with their teams We will assume that you have read the material before class

CHEM-C 117 PRINC OF CHEM & BIOCHEM I (3 CR)

This is an invitation only, small (50 students maximum) section of C117 that is intended for students who plan to continue to organic chemistry or other later courses in chemistry and would benefit from a smaller, more structured section. The course will use a specifications-based grading scheme in which students will get credit for showing mastery of core and advanced topics, and the final grade will be determined by the number of topics students master. Students will be asked to commit to being a part of a supportive and respectful learning community, to attending at least one office hour per week at any point that they are struggling, and to submitting work that accurately reflects their understanding of the material.

| | | EVOLUTION AND ANALYSIS OF BRAIN-BODY-ENVIRONMENT SYSTEMS | | | | | | | | | | |
| | | Notions of embodiment, situatedness and dynamics are becoming increasingly important in cognitive science, converging on a view in which an agent's behavior and cognition are seen not merely as products of its brain alone, but rather as arising from the interaction between the agent's nervous system, body and environment. In order to evaluate the significance of these ideas, this course will examine the construction and analysis of models of complete brain-body-environment systems, with a particular emphasis on the use of tools from complex systems (including evolutionary algorithms, dynamical systems theory and information theory) to study how such coupled systems work. Behaviors to be examined range from basic motor behavior and sensorimotor learning to categorical perception, selective attention, agency detection and communication. We will also examine some of the broader implications of the brain-body-environment perspective for thinking about brain and behavior. | | | | | | | | | | |

| This is an experimental "flipped" version of Finite: before each recitation, students will be responsible for working through online tutorials on their own, and class time will be devoted to working problems. Attendance will be mandatory and part of the grade, with activities in every class. Except for the final exam, the exams will be show-your-work with partial credit (not multiple choice!). ++No alternative Final Exam options will be considered ++Consult Final Examination Schedule to avoid conflicts | | | | | | | | | |

This practicum is geared toward students interested in a career in brand management or as a creative service provider for brands. The course offers students the opportunity to work on a real brand (preferably national) with teammates who offer a variety of expertise including strategy, design, and media. Students from the Kelley School of Business, The Media School, and the Eskenazi School of Art, Architecture + Design are encouraged to enroll. This team composition mimics what students will experience in their future jobs and hence, prepares them to see a business problem from a different lens and appreciate the diversity of views. This course provides students with a unique learning experience of applying the synergy of different talents, knowledge, skills, and perspectives to create effective strategies, tactics, and deliverables for a brand that can be implemented in the real world. Application is required for enrollment:

CLSD 10151 ARR ARR WB WEB Allen C 25 0 0
 In this course, students will begin to explore the personal, institutional, political, and cultural forces that impact the lived experience of being a professional teacher
 Possible key questions for reflection include: How does self-knowledge help teachers positively shape their professional lives? How does school culture shape the day-to-day life of teachers and how do you identify a school culture that is right for you? How does the current emphasis on standardized testing impact the life of a teacher and how can teachers positively respond to this? What does it mean to be a "role model" and what are the challenges and opportunities presented by this social role? What does community mean and how are teachers participants in and facilitators of positive community?
 Exploration of these questions will occur through student centered, hands-on, and interactive classroom activities

 This course is designed to assist the transformation from student to teacher. It allows students to delve more deeply into areas of interest by attending workshops and events in the School of Education; often these experiences include learning from alumni teachers, principals, and other administrators who are currently in the field. Taken entirely at the student's pace, the class includes attendance at live School of Education professional development events (either in-person or on Zoom) followed by reflective writing submitted via Canvas.
 Above class also requires additional mandatory participation in three in-person workshops. The days and times of those workshops can be found on Career Connections' Workshops and Training page here: <https://tinyurl.com/yyvzggwt>

VT: TACKLING TEST ANXIETY

CLSD 33929 03:00 P-03:50 P TR ED 3015 Guest-Scott A 19 0 0

TOPIC : Tackling Test Anxiety

Are you dreading an upcoming test? Do you blank out or have trouble focusing every time you take a big exam? Are you frustrated because you consistently find that your scores don't match what you feel you really know? Preparing for an important professional school entrance exam the MCAT, LSAT, etc.?

This course is all about evidence-backed strategies for taking your anxiety level way down for any kind of test whether that be for professional school entrance exams or finals in your most difficult courses.

Our approach centers on how to 1) apply the science of powerful learning to better prepare for important tests; 2) create effective schedules and habits for studying so it sticks; and 3) transform the emotions that come up before, during, and after the test to achieve your performance and professional goals.

 P 100 : For Jacobs School of Music undergrad majors with some pianistic background. Prerequisite ability includes completion of MUS-P 131 or equivalent experience and the ability to sight read treble and bass clefs simultaneously.
 Less advanced students see MUS-P 111, P 121, P 131.
 It is the students' responsibility to contact their teacher as soon as teacher assignments have been emailed during the first week. If you have questions regarding proper level, please contact the secondary piano coordinator, secpiano@indiana.edu, MA 155, 812-855-9009. Advisors: Please discourage guessing at level, as this usually results in a schedule adjustment.
 Above class meets with MUS-P 700, Z 110, and Z710

| | TOPIC: Introduction to Survey Research Above class meets with SPEA-V 550 According to Jonathan Rosenberg, former senior vice president of Google, Data is the sword of the 21st century, those who wield it well, the Samurai. In recent decades, survey data have become powerful swords that inform government policy making, business and nonprofit decision-making, political campaigns, legal decisions, and academic research in many fields of study. This course will give you the skills that you will need to harness the power of surveys: How do I select a sample? How do I design survey questions? How do I collect the data? As part of the class, students will be exposed to many real world survey examples. This is a rigorous, upper-level undergraduate class designed for those with an interest in research methods. | | | | | | | | |
