NAICS: It's Not a Disease, But It Will Be Contagious

AICS, the North American Industry Classification System, is a new method of categorizing industries, devised by the U.S., Mexican and Canadian governments. It replaces the SIC (Standard Industrial Classifications) codes. Such classifications are important to businesses seeking competitive intelligence or business leads; to government and academics tracking trends in jobs and wages for policy and research purposes; and to economic developers in understanding the structure of their economies and their regional, state and national context.

NAICS (pronounced 'nakes') identifies hundreds of new, emerging and advanced technology industries through 20 broad divisions (compared to nine divisions under SIC). It also provides direct comparison between our NAFTA trading partners, Mexico and Canada.

The new code scheme has, for the most part, affected only the 1997 Economic Censuses and County Business Patterns so far. But soon, we will begin to see a new set of industries with the monthly, quarterly and annual data released by the Bureaus of Labor Statistics (BLS) and Economic Analysis (BEA).

There is a downside to the release of data using the new classification system—lack of comparable trends data. There were significant changes in all of the industry divisions, meaning that manufacturing under NAICS is different, as are the other nine divisions that became 20. Many agencies don't plan to publish dual sets of data, for the obvious reason

Code	NAICS Sectors				
11	Agriculture, Forestry, Fishing and Hunting				
21	Mining				
22	Utilities				
23	Construction				
31-33	Manufacturing				
42	Wholesale Trade				
44-45	Retail Trade				
48-49	Transportation and Warehousing				
51	Information				
52	Finance and Insurance				
53	Real Estate and Rental and Leasing				
54	Professional, Scientific and Technical Services				
55	Management of Companies and Enterprises				
56	Administrative and Support and Waste				
	Management and Remediation Services				
61	Education Services				
62	Health Care and Social Assistance				
71	Arts, Entertainment and Recreation				
72	Accommodation and Food Services				
81	Other Services (except Public Administration)				
92	Public Administration				

of expense as well as the need to move forward with this more refined view of our economy (see Table 1).

Table 2 is a schedule of data series and the dates of their release under the

new code scheme. For those of our readers who are frequent users of data online (via STATS Indiana, for example), we recommend that you keep this calendar handy.

Table 2: Major Income and Employment Series Soon to be Published by NAICS			
Income and Employment Data Series	Agency	Publication Year	
2001 State Personal Income	BEA	2002	
2001 County Personal Income	BEA	2003	
2002 Gross State Product	BEA	2004	
May 2003 Current Employment Statistics	BLS	June 2003	
2001 Covered Employment and Wages	BLS	Fall 2002	
2002—4th Quarter—Occupational Employment Statistics	BLS	January 2004
