Local Redistricting Spreadsheet Documentation

April 2012

Cities and towns are in the process of establishing election districts for 2012. To assist them in retrieving the Census 2010 block data they need, the IBRC (at the request of the Indiana Association of Cities and Towns) has extracted these spreadsheets, which include block data for each county in the state. These data were extracted directly from Census 2010 Summary File 1 provided by the U.S. Census Bureau. The files include total population and the population by age and sex. If you have questions, please contact us at ibrc@iupui.edu.
