## **A. Overview**

The Migration Data Users guide provides a detailed description of the State-to-State, County-to-County, and Gross Migration files produced by the Internal Revenue Service (IRS) Statistics of Income (SOI) Division. IRS Migration data for the United States are based on year-to-year address changes reported on individual income tax returns filed with the IRS. They present migration patterns by State or by county and are available for inflows—the number of new residents who moved to a State or county and where they migrated from, and outflows—the number of residents leaving a State or county and where they went. The data also include tabulations on the number of non-migrant returns within a State or county.

## **B. Nature of Changes**

The following changes were made to the 2019-2020 migration data:

- A new methodology was used to count the number of individuals associated with the return, due to the phasing out of personal and dependent exemptions. The previous field, Number of exemptions, will be replaced by the Number of individuals and is based on the taxpayer's filing status and available return information on dependents. The variable name (N2) on the CSV files will remain the same.
- Returns filed for the purpose of receiving an Economic Impact Payment (EIP), due to the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), were included in the data to the extent that a taxpayer had a matching return over the two year period.
- Parts of Valdez-Cordova Census Area were renamed into two separate Census Areas: Chugach Census Area (FIPS code 063) and Copper River Census Area (FIPS code 066).

To enhance the disclosure protection procedures of the data, the following changes were made to the migration data beginning with 2018-2019 file:

- The State totals and header rows were removed from all county files. State totals can now only be obtained from the State files.
- Counts below 20 at the county level will now be deleted. Previously, counts below 20 were moved to a similar category to another county within the State.
- Data will be removed from the State files only if the counts are below a threshold of 10 returns.

- Records may be removed at the county level that are not removed at the State level. As such, the county totals may not add to the State totals.

## **C. Definitions and Explanations**

### **C.1 Basic Source Information**

- Migration data are based on the population of Forms 1040 that were filed and processed by the IRS during calendar years 2019 and 2020. In addition, tax year 2019 paper returns were included up until mid-July of 2021 because of processing delays due to the COVID-19 pandemic. During this period, the bulk of returns filed with the IRS were for Tax Years 2018 (received in calendar year 2019) and Tax Year 2019 (received in calendar year 2020). Returns received in 2019 represent income that was earned in 2018. Returns received in 2020 represent income that was earned in 2019. Also, during this period, a number of returns were filed representing prior tax years. For matching purposes, prior year returns are not used in the migration data.
- The address shown on the tax return is a mailing address that may not reflect the taxpayer's actual residence. In addition, the address may not reflect the location of the taxpayer when the income was earned, as a taxpayer may move during the course of a tax year. Thus, the income may have been earned in two locations. In addition, a taxpayer may move after the end of the tax year but file their return on time up to nine months later from another location.
- Due to continuing efforts to combat identity theft, the method in which the IRS processes returns may undergo changes. These processing changes may have an impact on the migration data and should be considered when comparing the data across years.
- Totals may not be comparable to other totals published elsewhere by SOI because of specific features of the migration data. [1]
- Data do not represent the full U.S. population because many individuals are not required to file an individual income tax return.
- Tax returns are assigned a State and County FIPS [2] code using a ZIP+4-to-County codebook developed by the U.S. Census Bureau.
- Tax returns filed without a ZIP code and returns filed with a ZIP code that did not match the State code shown on the return were excluded.
- Tax returns where the taxpayer was claimed as a dependent on another tax return in the second year (2020) were excluded. Tax returns where the taxpayer was claimed as a dependent in the first year (2019) and filed in the second year as a non-dependent taxpayer were included.
- Foreign tax returns as well as those filed using Army Post Office (APO) and Fleet Post Office addresses, addresses in Puerto Rico, Guam, Virgin Islands, American Samoa, Marshall Islands, Northern Marianas, and Palau have been included in the migration data
- The age of the primary taxpayer is used to place returns in various age categories. The primary taxpayer's age is derived by matching the Social Security numbers on the individual income tax return to information from the Social Security Administration (SSA).
- Tax returns with an Individual Taxpayer Identification Number (ITIN) issued by the IRS are included within the migration data. Information on an individual taxpayer's age, for returns with an ITIN, is derived from IRS administrative systems. See endnote 3 for more information on ITINs.

## C.2 Matching Returns

Tax returns are matched for two consecutive calendar years based on the filer's taxpayer identification number (TIN). Migration data for 2010-2011 and earlier, returns were matched based on the TIN of the primary filer only. Beginning with the 2011-2012 data, returns will be matched on the TIN of the primary, secondary, and dependent filers. The matching process is done in the following order:

Matching order	Year 1	Year 2	Percent of the total matched returns
1	Primary filer	Primary filer	94.6%
2	Primary filer	Secondary filer	0.8%
3	Secondary filer	Primary filer	1.7%
4	Secondary filer	Secondary filer	less than 0.1%
5	Dependent filers	Primary filer	2.8%
6	Dependent filers	Secondary filer	less than 0.1%

To avoid duplicate matching, only returns that did not match based on the primary-to-primary match were used for the subsequent matches. Under the previous methodology, married tax filers who changed filing positions (i.e. from primary-to-secondary or dependent-to-primary), between the two years, would be excluded from the migration data. As an example, if a secondary filer on a joint return in year 1 filed as a single or head of household filer in year 2, that return would not be included in the data. Likewise, individuals who were dependents in year 1, but filed as a primary or secondary tax filer in year 2, would be excluded.

Under the new methodology, if a filer changed their filing position between the two years and a matching TIN was found in the primary or secondary position, then that return would be included in the migration data. Using the same examples as above, if a secondary filer was on a married filing joint return in year 1, but filed single in year 2, that return would now be included. Also, if an individual was a dependent listed on a return in year 1, but became a primary or secondary filer in year 2, and was not claimed as a dependent, that return would now be included.

Returns that would still be excluded, under the new methodology, are those who did not have a matching TIN between year 1 and year 2. A non-matching return can occur if a TIN is recorded incorrectly between the two years; if a taxpayer switches from a temporary TIN to a permanent Social Security Number (SSN); or if a taxpayer filed a return in one year, but did not timely file a return in another year [3].

## C.3 Migration Status

After matching returns for two consecutive years, each return is assigned one of four migrant statuses.

- (1) Non-migrant returns – these are individual returns where the state and county in year 1 matches the state and county in year 2. A non-migrant return does not necessarily mean that a taxpayer did not move. If a taxpayer moved, but stayed in the same county and state, they would be considered a non-migrant.
- (2) Migrant return, different state – these are individual returns where the state and county in one year does not match the state and county in another year.
- (3) Migrant return, same state, different county – these are individual returns where the state is the same between the two years, but the county in one year is different than the county in another year.
- (4) Migrant return, foreign – these are individual returns where the state is in the United States in one year and foreign (APO/FPO, Puerto Rico, U.S. Virgin Islands, overseas, or other) in another year.

## C.4 Geocoding Tax Returns

Tax returns are assigned county codes based on an internal-use nine-digit ZIP Code-to-county Codebook developed by the Census Bureau. The Codebook is revised annually based on new geographic information. Consequently, a return with a given nine-digit ZIP Code listed in county X in year one can be listed in county Y in year two, independent of an actual address change on the return. Most annual revisions have a very minor impact on the overall county-to-county distribution of returns. To document and quantify the impact of these revisions, the Calendar Year 2019 tax return population file was geocoded using both the 2019 and 2020 Codebooks. The number of returns, where the county codes differed between the two years, was then tabulated.

Because the 2019-2020 migration data was produced by applying the 2020 Codebook to the 2019 and 2020 population files, the Codebook revisions do NOT affect the in-flow and out-flow migration totals. They do affect a comparison of non-migrants with previous years. In other words, the impact of the Codebook revisions is contained in the non-migrant totals.

Table 1 (see Appendix 1) shows the results for counties that had a **net** absolute change of 100 returns or more sorted by the absolute value of the net percentage change, based on the 2019 and 2020 ZIP Code-to-county Codebooks. Table 2 (see Appendix 2) shows the same results sorted by state and county. Individual counties with a positive net percentage change experienced a greater number of returns being geocoded to that county using the 2020 Codebook as opposed to the 2019 Codebook. Individual counties with a negative net percentage change experienced fewer returns being geocoded to that county using the 2020 Codebook versus the 2019 Codebook. This list of counties should be considered when making year-to-year comparisons with previous migration data.

## **D. Disclosure Protection Procedures**

To protect the confidentiality of information of individual taxpayers, SOI took the following precautions:

- For the State-to-State migration flows a cell must have at least 10 returns to be shown. In the Excel version of the state-to-state flows, deleted categories have been identified with a “d”. In the CSV version of the county-to-county flows, deleted categories are notated with a -1
- For the County-to-County migration flows a cell must have at least 20 returns to be shown. In the Excel version of the county-to-county flows, deleted categories have been identified with a “d”. In the CSV version of the county-to-county flows, deleted categories are notated with a -1.
- At the county level, counties with less than 20 returns have been aggregated into various “Other Flows” categories. The Other Flows categories are Same State, Different State, Foreign, as well as by region (Northeast, Midwest, South, and West). See section E.6 for a list of the “Other Flows” categories and codes.
- Other Flows categories with less than 20 returns have been removed. In the Excel version of the county-to-county flows, deleted categories have been identified with a “d”. In the CSV version of the county-to-county flows, deleted categories are notated with a -1.
- At the county level only, certain matched tax returns that represented a specified percentage of the total of any particular cell have been excluded. For example, if one return represented 75 percent of the value of a given cell, the return was suppressed from the county detail. The actual threshold percentage used cannot be released.
- For the Gross Migration file a cell must have at least 10 returns in order to be shown. Cells with less than 10 returns have been combined with another AGI class within the same age classification, within the same state.
- Excluded from the Gross Migration file are tax returns with a negative adjusted gross income.

## E. Migration Data Files

### E.1 State-to-State Outflow Files

The State-to-State outflow migration files represent the migration flows from the origin state, in year 1, to the destination state, in year 2. There are 51 files for each state plus the District of Columbia. Included in the list of outflow states are the number of returns that migrated to a foreign location [4]. Each file tabulates the number of returns, number of individuals, and adjusted gross income (AGI) by state and is available as a MS Excel spreadsheet or as a CSV (comma separated) file. The number of individuals and AGI are based on the year 2 tax return.

#### E.1.a State Outflow Records

Each state file contains five header records that show (1) the total U.S. and foreign out-migration for that state, (2) the total U.S. out-migration, (3) the total foreign out-migration, (4) the total same state migration for that state, and (5) the total non-migrants. Below is an example of the state-to-state outflow header:

Origin from Haw aii (State Code)	Destination into			Number of returns (1)	Number of individuals [1] (2)	Adjusted gross income (AGI) (3)
	State Code	State	State Name			
15	96	HI	HI Total Migration-US and Foreign	29,094	61,162	1,879,034
15	97	HI	HI Total Migration-US	28,126	58,775	1,807,565
15	98	HI	HI Total Migration-Foreign	968	2,387	71,468
15	97	HI	HI Total Migration-Same State	3,094	5,369	173,157
15	15	HI	HI Non-migrants	560,646	1,127,908	41,730,613

Following the header records are the state-to-state out-migration records that have been ranked, in descending order, by the number of returns.

#### E.1.b State Outflow Record Layout

The State Outflow files are available as a MS Excel spreadsheet or a CSV (comma separated) file. The files have the following naming convention:

- Individual state Excel files (State Outflow Tab) – **1920XX.xls** (XX = AL-WY)
- A comma separated file – **stateoutflow1920.csv**

Below is the record layout for the State Outflow comma separated file:

VARIABLE NAME	DESCRIPTION/VALUES
1. Y1_STATEFIPS	State FIPS Code of Origin from Year 1  Alabama to Wyoming [2]..... 01 to 56
2. Y2_STATEFIPS	State FIPS Code of Destination from Year 2  Alabama to Wyoming [2]..... 01 to 56 Foreign..... 57 Total Migration – US and Foreign..... 96 Total Migration – US..... 97 Total Migration – Foreign..... 98 Total Migration – Same State.....97
3. Y2_STATE	State Abbreviation or Postal Code of Destination from Year 2

4. Y2_STATE_NAME	Alabama to Wyoming ..... AL to WY Foreign..... FR
	State Name of Destination from Year 2  See Y2_STATEFIPS for list of names NOTE: Non-migrants are identified as those whose state of origin is the same as their state of destination.
5. N1	Number of returns  Suppressed data value.....-1 Potential values.....3 to 999999999
	6. N2
7. AGI	Number of individuals  Suppressed data value.....-1 Potential values.....3 to 999999999
	Adjusted Gross Income (AGI)  Suppressed data value.....-1 Potential values..... -999999999 to 999999999 NOTE: AGI is reported in thousands of dollars. Amounts include records with adjusted gross deficit. AGI is based on the year 2 tax return.

## E.2 State-to-State Inflow Files

The State-to-State inflow migration files represent the migration flows into the destination state, in year two, from the origin state, in year one. There are 51 files for each state plus the District of Columbia. Included in the list of inflow states are the number of returns that migrated from a foreign location [4]. Each file tabulates the number of returns, number of individuals, and adjusted gross income (AGI) by state and is available as a MS Excel spreadsheet or as a CSV (comma separated) file. The number of individuals and AGI are based on the year 2 tax return.

### E.2.a State Inflow Records

Each state file contains five header records that show (1) the total U.S. and foreign in-migration for that state, (2) the total U.S. in-migration, (3) the total foreign in-migration, (4) the total same state migration for that state, and (5) the total non-migrants. Below is an example of the state-to-state inflow header:

Destination into Oregon (State Code)	Origin from			Number of returns (1)	Number of individuals [1] (2)	Adjusted gross income (AGI) (3)
	State Code	State	State Name			
	41	96	OR			
41	97	OR	OR Total Migration-US	69,339	116,294	4,984,411
41	98	OR	OR Total Migration-Foreign	256	499	15,202
41	97	OR	OR Total Migration-Same State	68,742	117,401	4,312,578
41	41	OR	OR Non-migrants	1,531,301	3,150,277	125,129,695

Following the header records are the state-to-state in-migration records that have been ranked, in descending order, by the number of returns.

## E.2.b State Inflow Record Layout

The State Inflow files are available as a MS Excel spreadsheet or a CSV (comma separated) file. The files have the following naming convention:

- Individual state Excel files (State Inflow Tab) – **1920XX.xls** (XX = AL-WY)
- A comma separated file – **stateinflow1920.csv**

Below is the record layout for the State Inflow comma separated file:

VARIABLE NAME	DESCRIPTION/VALUES
1. Y2_STATEFIPS	State FIPS Code of Destination from Year 2  Alabama to Wyoming [2]..... 01 to 56
2. Y1_STATEFIPS	State FIPS Code of Origin from Year 1  Alabama to Wyoming [2]..... 01 to 56 Foreign..... 57 Total Migration – US and Foreign..... 96 Total Migration – US..... 97 Total Migration – Foreign..... 98 Total Migration – Same State.....97
3. Y1_STATE	State Abbreviation or Postal Code of Origin from Year 1  Alabama to Wyoming ..... AL to WY Foreign..... FR
4. Y1_STATE_NAME	State Name of Origin from Year 1  See Y1_STATEFIPS for list of names NOTE: Non-migrants are identified as those whose state of destination is the same as their state of origin.
5. N1	Number of returns  Suppressed data value.....-1 Potential values.....3 to 999999999
6. N2	Number of individuals  Suppressed data value.....-1 Potential values.....3 to 999999999
7. AGI	Adjusted Gross Income (AGI)  Suppressed data value.....-1 Potential values..... -999999999 to 999999999 NOTE: AGI is reported in thousands of dollars. Amounts include records with adjusted gross deficit. AGI is based on the year 2 tax return.

### E.3 County-to-County Outflow Files

The County-to-County outflow migration files represent the migration flows from the origin state and county, in year one, to the destination state and county, in year two. There are 51 files for each state plus the District of Columbia. Included in the list of county flows are the number of returns that migrated to a foreign location [4]. The migration flows include the following county equivalents (Parishes in Louisiana, Boroughs, Census Areas, and municipalities in Alaska, independent cities, such as Baltimore, Maryland, and the District of Columbia).

Each file tabulates the number of returns, number of individuals, and adjusted gross income (AGI) by county and is available as a MS Excel spreadsheet or as a CSV (comma separated) file. The number of individuals and AGI are based on the year 2 tax return.

#### E.3.a County-to-County Outflow Records

Each state file contains six header records, for each county, that show (1) The total U.S. and foreign out-migration for that county, (2) the total U.S. out-migration for that county, (3) the total same state migration for that county, (4) the total different state out-migration for that county, (5) the total foreign out-migration for that county, (6) the total non-migrants for the county.

Below is an example of the County-to-County outflow header:

Origin from Rhode Island		Destination to				Number of returns	Number of individuals [1]	Adjusted gross income (AGI)
State Code	County Code	State Code	County Code	State	County Name			
						(1)	(2)	(3)
44	001	96	000	RI	Bristol County Total Migration-US and Foreign	1,449	2,399	138,921
44	001	97	000	RI	Bristol County Total Migration-US	1,449	2,399	138,921
44	001	97	001	RI	Bristol County Total Migration-Same State	680	1,107	49,202
44	001	97	003	RI	Bristol County Total Migration-Different State	769	1,292	89,719
44	001	44	001	RI	Bristol County Non-migrants	18,945	38,816	2,477,593

Following the county header records are the county-to-county migration records that have been sorted first by county and then ranked, in descending order, by the number of returns.

Additionally, county-to-county flows that have less than 10 returns have been categorized into seven "Other flows" categories. The categories include:

- (1) Other flows – Same State represents returns that migrated to another county within the same state.
- (2) Other flows – Different State represents returns that migrated to a different state and county.
- (3) Other flows – Northeast represents returns that migrated to a Northeastern state. See list of states in section E.6.
- (4) Other flows – Midwest represents returns that migrated to a Midwestern state. See list of states in section E.6.
- (5) Other flows – South represents returns that migrated to a Southern state. See list of states in section E.6.
- (6) Other flows – West represents returns that migrated to a Western state. See list of states in section E.6.
- (7) Foreign - Other flows represents returns that migrated to a foreign location [4].

#### E.3.b County-to-County Outflow Record Layout

The County Outflow files are available as a MS Excel spreadsheet or a CSV (comma separated) file. The files have the following naming convention:

- Individual state Excel files (County Outflow Tab) – **1920XX.xls** (XX = AL-WY)
- A comma separated file – **countyoutflow1920.csv**

Below is the record layout for the County Outflow comma separated file:

VARIABLE NAME	DESCRIPTION/VALUES
1. Y1_STATEFIPS	<p>State FIPS Code of Origin from Year 1</p> <p>Alabama to Wyoming [2]..... 01 to 56</p>
2. Y1_COUNTYFIPS	<p>County FIPS Code of Origin from Year 1</p> <p>State total record..... 000            Potential values..... 001 to 840            NOTE: Some Y1_COUNTYFIPS = 000 records correspond to special summary level records. See section E.6 for a full list of summary level records. See endnote [2] for official county FIPS codes.</p>
3. Y2_STATEFIPS	<p>State FIPS Code of Destination from Year 2</p> <p>Alabama to Wyoming [2]..... 01 to 56            Special summary level records..... 57 to 59 and 96 to 98            NOTE: See section E.6 for a full list of summary level records.</p>
4. Y2_COUNTYFIPS	<p>County FIPS code of Destination from Year 2</p> <p>State total record..... 000            Potential values..... 001 to 840</p>
5. Y2_STATE	<p>State Abbreviation or Postal Code of Destination from Year 2</p> <p>Alabama to Wyoming ..... AL to WY            Foreign..... FR            Other flows – Same State..... SS            Other flows – Different State and            Other flows by region            (Northeast, Midwest, South, West)..... DS            NOTE: See section E.6 for a full list of summary level records.</p>
6. Y2_COUNTYNAME	<p>County Name of Destination from Year 2</p> <p>NOTE: The county or county equivalent name is based on the actual state county name, except as noted below. See section E.6 for a full list of summary level records.</p> <p>For county total records, the name will take the following format:            [State County Name] Total Migration – US and Foreign            [State County Name] Total Migration – US            [State County Name] Total Migration – Same State            [State County Name] Total Migration – Different State            [State County Name] Total Migration – Foreign</p> <p>For non-migrant records, the name will take the following format:            [State County Name] Non-migrants</p> <p>For the foreign records, the name will take the following format:            Foreign – Overseas            Foreign – Puerto Rico            Foreign – APO/FPO ZIPs            Foreign – US Virgin Islands</p>

	<p>For the other flows records, the name will take the following format:</p> <p>Other flows – Same State  Other flows – Different State  Other flows – Northeast  Other flows – Midwest  Other flows – South  Other flows – West  Foreign – other flows</p>
7. N1	<p>Number of returns</p> <p>Suppressed data value.....-1  Potential values.....3 to 999999999</p>
8. N2	<p>Number of individuals</p> <p>Suppressed data value.....-1  Potential values.....3 to 999999999</p>
9. AGI	<p>Adjusted Gross Income (AGI)</p> <p>Suppressed data value.....-1  Potential values..... -999999999 to 999999999  NOTE: AGI is reported in thousands of dollars. Amounts include records with adjusted gross deficit. AGI is based on the year 2 tax return.</p>

#### E.4 County-to-County Inflow Files

The County-to-County inflow migration files represent the migration flows into the destination state and county, in year one, from the origin state and county, in year two. There are 51 files for each State plus the District of Columbia. Included in the list of county flows are the number of returns that migrated from a foreign location [4]. The migration flows include the following county equivalents (Parishes in Louisiana, Boroughs, Census Areas, and municipalities in Alaska, independent cities, such as Baltimore, Maryland, and the District of Columbia).

Each file tabulates the number of returns, number of individuals, and adjusted gross income (AGI) by county and is available as a MS Excel spreadsheet or as a CSV (comma separated) file. The number of individuals and AGI are based on the year 2 tax return.

### E.4.a County-to-County Inflow Records

Each state file contains six header records, for each county, that show (1) The total U.S. and foreign in-migration for that county, (2) the total U.S. in-migration for that county, (3) the total same state migration for that county, (4) the total different state in-migration for that county, (5) the total foreign in-migration for that county, and (6) the total non-migrants for that county.

Below is an example of the County-to-County inflow header:

Destination into Arizona		Origin from				Number of returns	Number of individuals [1]	Adjusted gross income (AGI)
State Code	County Code	State Code	County Code	State	County Name	(1)	(2)	(3)
04	001	96	000	AZ	Apache County Total Migration-US and Foreign	1,998	4,917	63,007
04	001	97	000	AZ	Apache County Total Migration-US	1,998	4,917	63,007
04	001	97	001	AZ	Apache County Total Migration-Same State	910	2,265	30,060
04	001	97	003	AZ	Apache County Total Migration-Different State	1,088	2,652	32,947
04	001	98	000	AZ	Apache County Total Migration-Foreign	d	d	d
04	001	04	001	AZ	Apache County Non-migrants	17,799	48,121	681,894

Following the county header records are the county-to-county migration records that have been sorted first by county and then ranked, in descending order, by the number of returns.

Additionally, county-to-county flows that have less than 10 returns have been categorized into seven “Other flows” categories. The categories include:

- (1) Other flows – Same State represents returns that migrated from another county within the same state.
- (2) Other flows – Different State represents returns that migrated from a different state and county.
- (3) Other flows – Northeast represents returns that migrated from a Northeastern state. See list of states in section E.6.
- (4) Other flows – Midwest represents returns that migrated from a Midwestern state. See list of states in section E.6.
- (5) Other flows – South represents returns that migrated from a Southern state. See list of states in section E.6.
- (6) Other flows – West represents returns that migrated from a Western state. See list of states in section E.6.
- (7) Foreign - Other flows represents returns that migrated from a foreign location [4].

### E.4.b County-to-County Inflow Record Layout

The County Inflow files are available as a MS Excel spreadsheet or a CSV (comma separated) file. The files have the following naming convention:

- Individual state Excel files (County Inflow Tab) – **1920XX.xls** (XX = AL-WY)
- A comma separated file – **countyinflow1920.csv**

Below is the record layout for the County Outflow comma separated file:

VARIABLE NAME	DESCRIPTION/VALUES
1. Y2_STATEFIPS	State FIPS Code of Destination from Year 2

Alabama to Wyoming [2]..... 01 to 56

**2. Y2\_COUNTYFIPS**

County FIPS Code of Destination from Year 2

State total record..... 000

Potential values..... 001 to 840

NOTE: Some Y2\_COUNTYFIPS = 000 records correspond to special summary level records. See section E.6 for a full list of summary level records. See endnote [2] for official county FIPS codes.

**3. Y1\_STATEFIPS**

State FIPS Code of Origin from Year 1

Alabama to Wyoming [2]..... 01 to 56

Special summary level records..... 57 to 59 and 96 to 98

NOTE: See section E.6 for a full list of summary level records.

**4. Y1\_COUNTYFIPS**

County FIPS code of Origin from Year 1

State total record..... 000

Potential values..... 001 to 840

**5. Y1\_STATE**

State Abbreviation or Postal Code of Origin from Year 1

Alabama to Wyoming ..... AL to WY

Foreign..... FR

Other flows – Same State..... SS

Other flows – Different State and

Other flows by region

(Northeast, Midwest, South, West)..... DS

NOTE: See section E.6 for a full list of summary level records.

**6. Y1\_COUNTYNAME**

County Name of Origin from Year 1

NOTE: The county or county equivalent name is based on the actual state county name, except as noted below. See section E.6 for a full list of summary level records.

For county total records, the name will take the following format:

[State County Name] Total Migration – US and Foreign

[State County Name] Total Migration – US

[State County Name] Total Migration – Same State

[State County Name] Total Migration – Different State

[State County Name] Total Migration – Foreign

For non-migrant records, the name will take the following format:

[State County Name] Non-migrants

For the foreign records, the name will take the following format:

Foreign – Overseas

Foreign – Puerto Rico

Foreign – APO/FPO ZIPs

Foreign – US Virgin Islands

For the other flows records, the name will take the following format:

Other flows – Same State

Other flows – Different State

Other flows – Northeast

Other flows – Midwest

Other flows – South

Other flows – West Foreign – other flows	
7. N1	Number of returns
	Suppressed data value.....-1
	Potential values.....3 to 999999999
8. N2	Number of individuals
	Suppressed data value.....-1
	Potential values.....3 to 999999999
9. AGI	Adjusted Gross Income (AGI)
	Suppressed data value.....-1
	Potential values..... -999999999 to 999999999
	NOTE: AGI is reported in thousands of dollars. Amounts include records with adjusted gross deficit. AGI is based on the year 2 tax return.

### E.5 Gross Migration File

The Gross Migration file is a summary of the migration flows for each state, plus the District of Columbia [5]. The data are divided into five return groups that include: (1) the total number of matched returns; (2) the number of non-migrant returns; (3) the number of outflow returns; (4) the number of inflow returns; and (5) the number of same state returns [6]. Each group is further divided into six age categories. Returns are categorized by age based on the date of birth of the primary taxpayer only. The six age categories include: (1) under 26; (2) 26 under 35; (3) 35 under 45; (4) 45 under 55; (5) 55 under 65; and (6) 65 and over. Each grouping also includes a tally for all ages.

In addition to the groupings mentioned above, the data for each state is also divided into seven adjusted gross income (AGI) classes, plus a total for all income classes. The AGI class is based on the AGI in year 2. The AGI classes include (1) \$1 under \$10,000; (2) \$10,000 under \$25,000; (3) \$25,000 under \$50,000; (4) \$50,000 under \$75,000; (5) \$75,000 under \$100,000; (6) \$100,000 under \$200,000; and (7) \$200,000 or more. The gross migration file does not include returns with adjusted gross deficit. The file tabulates the number of returns, number of individuals, the year 1 AGI (2019), and the year 2 AGI (2020) for each of the six age categories, within the five return groupings, by state and AGI class. Due to the omission of returns with adjust gross deficit, the state totals will not match similar totals in the state-to-state files.

The number of individuals is based on the year 2 tax return and all AGI amounts are reported in thousands of dollars.

### E.5.a Gross Migration File Record Layout

The Gross Migration file is available as a MS Excel spreadsheet or a CSV (comma separated) file. The files have the following naming convention:

- Individual Excel file – **1920inmigall.xls**
- A comma separated file – **1920inmigall.csv**

Below is the record layout for the Gross Migration comma separated file:

VARIABLE NAME	DESCRIPTION/VALUES
1. STATEFIPS	State FIPS Code  Alabama to Wyoming [2]..... 01 to 56
2. STATE	State Abbreviation or Postal Code  Alabama to Wyoming ..... AL to WY
3. STATE_NAME	State Name  See STATEFIPS for list of names
4. AGI_STUB	Size of adjusted gross income  All AGI classes..... 0 \$1 under \$10,000..... 1 \$10,000 under \$25,000..... 2 \$25,000 under \$50,000..... 3 \$50,000 under \$75,000..... 4 \$75,000 under \$100,000.....5 \$100,000 under \$200,000..... 6 \$200,000 or more..... 7
5. TOTAL_N1_0	Total Returns - number of returns, all ages  Potential values.....0, 10 to 999999999
6. TOTAL_N2_0	Total Returns – number of individuals, all ages  Potential values.....0, 10 to 999999999
7. TOTAL_Y1_AGI_0	Total Returns – adjusted gross income from Year 1, all ages  Potential values..... 0 to 999999999
8. TOTAL_Y2_AGI_0	Total Returns – adjusted gross income from Year 2, all ages  Potential values..... 0 to 999999999
9. TOTAL_N1_1	Total Returns - number of returns, primary taxpayers under age 26  Potential values.....0, 10 to 999999999
10. TOTAL_N2_1	Total Returns – number of individuals, primary taxpayers under age 26  Potential values.....0, 10 to 999999999

11. TOTAL_Y1_AGI_1	Total Returns – adjusted gross income from Year 1, primary taxpayers under age 26 Potential values..... 0 to 999999999
12. TOTAL_Y2_AGI_1	Total Returns – adjusted gross income from Year 2, primary taxpayers under age 26 Potential values..... 0 to 999999999
13. TOTAL_N1_2	Total Returns - number of returns, primary taxpayers ages 26 under 35 Potential values.....0, 10 to 999999999
14. TOTAL_N2_2	Total Returns – number of individuals, primary taxpayers ages 26 under 35 Potential values.....0, 10 to 999999999
15. TOTAL_Y1_AGI_2	Total Returns – adjusted gross income from Year 1, primary taxpayers ages 26 under 35 Potential values..... 0 to 999999999
16. TOTAL_Y2_AGI_2	Total Returns – adjusted gross income from Year 2, primary taxpayers ages 26 under 35 Potential values..... 0 to 999999999
17. TOTAL_N1_3	Total Returns - number of returns, primary taxpayers ages 35 under 45 Potential values.....0, 10 to 999999999
18. TOTAL_N2_3	Total Returns – number of individuals, primary taxpayers ages 35 under 45 Potential values.....0, 10 to 999999999
19. TOTAL_Y1_AGI_3	Total Returns – adjusted gross income from Year 1, primary taxpayers ages 35 under 45 Potential values..... 0 to 999999999
20. TOTAL_Y2_AGI_2	Total Returns – adjusted gross income from Year 2, primary taxpayers ages 26 under 35 Potential values..... 0 to 999999999
21. TOTAL_N1_4	Total Returns - number of returns, primary taxpayers ages 45 under 55 Potential values.....0, 10 to 999999999
22. TOTAL_N2_4	Total Returns – number of individuals, primary taxpayers ages 45 under 55 Potential values.....0, 10 to 999999999
23. TOTAL_Y1_AGI_4	Total Returns – adjusted gross income from Year 1, primary taxpayers ages 45 under 55 Potential values..... 0 to 999999999
24. TOTAL_Y2_AGI_4	Total Returns – adjusted gross income from Year 2, primary taxpayers ages 45 under 55 Potential values..... 0 to 999999999
25. TOTAL_N1_5	Total Returns - number of returns, primary taxpayers ages 55 under 65 Potential values.....0, 10 to 999999999

26. TOTAL_N2_5	Total Returns – number of individuals, primary taxpayers ages 55 under 65 Potential values.....0, 10 to 999999999
27. TOTAL_Y1_AGI_5	Total Returns – adjusted gross income from Year 1, primary taxpayers ages 55 under 65 Potential values..... 0 to 999999999
28. TOTAL_Y2_AGI_5	Total Returns – adjusted gross income from Year 2, primary taxpayers ages 55 under 65 Potential values..... 0 to 999999999
29. TOTAL_N1_6	Total Returns - number of returns, primary taxpayers ages 65 and over Potential values.....0, 10 to 999999999
30. TOTAL_N2_6	Total Returns – number of individuals, primary taxpayers ages 65 and over Potential values.....0, 10 to 999999999
31. TOTAL_Y1_AGI_6	Total Returns – adjusted gross income from Year 1, primary taxpayers ages 65 and over Potential values..... 0 to 999999999
32. TOTAL_Y2_AGI_6	Total Returns – adjusted gross income from Year 2, primary taxpayers ages 65 and over Potential values..... 0 to 999999999
33. NONMIG_N1_0	Non-migrant Returns - number of returns, all ages Potential values.....0, 10 to 999999999
34. NONMIG_N2_0	Non-migrant Returns – number of individuals, all ages Potential values.....0, 10 to 999999999
35. NONMIG_Y1_AGI_0	Non-migrant Returns – adjusted gross income from Year 1, all ages Potential values..... 0 to 999999999
36. NONMIG_Y2_AGI_0	Non-migrant Returns – adjusted gross income from Year 2, all ages Potential values..... 0 to 999999999
37. NONMIG_N1_1	Non-migrant Returns - number of returns, primary taxpayers under age 26 Potential values.....0, 10 to 999999999
38. NONMIG_N2_1	Non-migrant Returns – number of individuals, primary taxpayers under age 26 Potential values.....0, 10 to 999999999
39. NONMIG_Y1_AGI_1	Non-migrant Returns – adjusted gross income from Year 1, primary taxpayers under age 26 Potential values..... 0 to 999999999
40. NONMIG_Y2_AGI_1	Non-migrant Returns – adjusted gross income from Year 2, primary taxpayers under age 26 Potential values..... 0 to 999999999

41. NONMIG_N1_2	Non-migrant Returns - number of returns, primary taxpayers ages 26 under 35 Potential values.....0, 10 to 999999999
42. NONMIG_N2_2	Non-migrant Returns – number of individuals, primary taxpayers ages 26 under 35 Potential values.....0, 10 to 999999999
43. NONMIG_Y1_AGI_2	Non-migrant Returns – adjusted gross income from Year 1, primary taxpayers ages 26 under 35 Potential values..... 0 to 999999999
44. NONMIG_Y2_AGI_2	Non-migrant Returns – adjusted gross income from Year 2, primary taxpayers ages 26 under 35 Potential values..... 0 to 999999999
45. NONMIG_N1_3	Non-migrant Returns - number of returns, primary taxpayers ages 35 under 45 Potential values.....0, 10 to 999999999
46. NONMIG_N2_3	Non-migrant Returns – number of individuals, primary taxpayers ages 35 under 45 Potential values.....0, 10 to 999999999
47. NONMIG_Y1_AGI_3	Non-migrant Returns – adjusted gross income from Year 1, primary taxpayers ages 35 under 45 Potential values..... 0 to 999999999
48. NONMIG_Y2_AGI_3	Non-migrant Returns – adjusted gross income from Year 2, primary taxpayers ages 35 under 45 Potential values..... 0 to 999999999
49. NONMIG_N1_4	Non-migrant Returns - number of returns, primary taxpayers ages 45 under 55 Potential values.....0, 10 to 999999999
50. NONMIG_N2_4	Non-migrant Returns – number of individuals, primary taxpayers ages 45 under 55 Potential values.....0, 10 to 999999999
51. NONMIG_Y1_AGI_4	Non-migrant Returns – adjusted gross income from Year 1, primary taxpayers ages 45 under 55 Potential values..... 0 to 999999999
52. NONMIG_Y2_AGI_4	Non-migrant Returns – adjusted gross income from Year 2, primary taxpayers ages 45 under 55 Potential values..... 0 to 999999999
53. NONMIG_N1_5	Non-migrant Returns - number of returns, primary taxpayers ages 55 under 65 Potential values.....0, 10 to 999999999
54. NONMIG_N2_5	Non-migrant Returns – number of individuals, primary taxpayers ages 55 under 65 Potential values.....0, 10 to 999999999
55. NONMIG_Y1_AGI_5	Non-migrant Returns – adjusted gross income from Year 1, primary taxpayers ages 55 under 65 Potential values..... 0 to 999999999

56. NONMIG_Y2_AGI_5	Non-migrant Returns – adjusted gross income from Year 2, primary taxpayers ages 55 under 65 Potential values..... 0 to 999999999
57. NONMIG_N1_6	Non-migrant Returns - number of returns, primary taxpayers ages 65 and over Potential values.....0, 10 to 999999999
58. NONMIG_N2_6	Non-migrant Returns – number of individuals, primary taxpayers ages 65 and over Potential values.....0, 10 to 999999999
59. NONMIG_Y1_AGI_6	Non-migrant Returns – adjusted gross income from Year 1, primary taxpayers ages 65 and over Potential values..... 0 to 999999999
60. NONMIG_Y2_AGI_6	Non-migrant Returns – adjusted gross income from Year 2, primary taxpayers ages 65 and over Potential values..... 0 to 999999999
61. OUTFLOW_N1_0	Outflow Returns - number of returns, all ages Potential values.....0, 10 to 999999999
62. OUTFLOW_N2_0	Outflow Returns – number of individuals, all ages Potential values.....0, 10 to 999999999
63. OUTFLOW_Y1_AGI_0	Outflow Returns – adjusted gross income from Year 1, all ages Potential values..... 0 to 999999999
64. OUTFLOW_Y2_AGI_0	Outflow Returns – adjusted gross income from Year 2, all ages Potential values..... 0 to 999999999
65. OUTFLOW_N1_1	Outflow Returns - number of returns, primary taxpayers under age 26 Potential values.....0, 10 to 999999999
66. OUTFLOW_N2_1	Outflow Returns – number of individuals, primary taxpayers under age 26 Potential values.....0, 10 to 999999999
67. OUTFLOW_Y1_AGI_1	Outflow Returns – adjusted gross income from Year 1, primary taxpayers under age 26 Potential values..... 0 to 999999999
68. OUTFLOW_Y2_AGI_1	Outflow Returns – adjusted gross income from Year 2, primary taxpayers under age 26 Potential values..... 0 to 999999999
69. OUTFLOW_N1_2	Outflow Returns - number of returns, primary taxpayers ages 26 under 35 Potential values.....0, 10 to 999999999
70. OUTFLOW_N2_2	Outflow Returns – number of individuals, primary taxpayers ages 26 under 35 Potential values.....0, 10 to 999999999

71. OUTFLOW_Y1_AGI_2	Outflow Returns – adjusted gross income from Year 1, primary taxpayers ages 26 under 35 Potential values..... 0 to 999999999
72. OUTFLOW_Y2_AGI_2	Outflow Returns – adjusted gross income from Year 2, primary taxpayers ages 26 under 35 Potential values..... 0 to 999999999
73. OUTFLOW_N1_3	Outflow Returns - number of returns, primary taxpayers ages 35 under 45 Potential values.....0, 10 to 999999999
74. OUTFLOW_N2_3	Outflow Returns – number of individuals, primary taxpayers ages 35 under 45 Potential values.....0, 10 to 999999999
75. OUTFLOW_Y1_AGI_3	Outflow Returns – adjusted gross income from Year 1, primary taxpayers ages 35 under 45 Potential values..... 0 to 999999999
76. OUTFLOW_Y2_AGI_3	Outflow Returns – adjusted gross income from Year 2, primary taxpayers ages 35 under 45 Potential values..... 0 to 999999999
77. OUTFLOW_N1_4	Outflow Returns - number of returns, primary taxpayers ages 45 under 55 Potential values.....0, 10 to 999999999
78. OUTFLOW_N2_4	Outflow Returns – number of individuals, primary taxpayers ages 45 under 55 Potential values.....0, 10 to 999999999
79. OUTFLOW_Y1_AGI_4	Outflow Returns – adjusted gross income from Year 1, primary taxpayers ages 45 under 55 Potential values..... 0 to 999999999

136. SAMEST_Y2_AGI_4	Same State Returns – adjusted gross income from Year 2, primary taxpayers ages 45 under 55 Potential values..... 0 to 999999999
137. SAMEST_N1_5	Same State Returns - number of returns, primary taxpayers ages 55 under 65 Potential values.....0, 10 to 999999999
138. SAMEST_N2_5	Same State Returns – number of individuals, primary taxpayers ages 55 under 65 Potential values.....0, 10 to 999999999
139. SAMEST_Y1_AGI_5	Same State Returns – adjusted gross income from Year 1, primary taxpayers ages 55 under 65 Potential values..... 0 to 999999999
140. SAMEST_Y2_AGI_5	Same State Returns – adjusted gross income from Year 2, primary taxpayers ages 55 under 65 Potential values..... 0 to 999999999
141. SAMEST_N1_6	Same State Returns - number of returns, primary taxpayers ages 65 and over Potential values.....0, 10 to 999999999
142. SAMEST_N2_6	Same State Returns – number of individuals, primary taxpayers ages 65 and over Potential values.....0, 10 to 999999999
143. SAMEST_Y1_AGI_6	Same State Returns – adjusted gross income from Year 1, primary taxpayers ages 65 and over Potential values..... 0 to 999999999
144. SAMEST_Y2_AGI_6	Same State Returns – adjusted gross income from Year 2, primary taxpayers ages 65 and over Potential values..... 0 to 999999999

## E.6 Special Summary Level Records

Special summary level records have been created specifically for the migration data. The names, State FIPS, and County FIPS codes will take on the following format:

### State Total Migration Flows:

	State FIPS	County FIPS
Total Migration – US and Foreign	96	000
Total Migration – US	97	000
Total Migration – Same State	97	001
Total Migration – Different State	97	003
Total Migration – Foreign	98	000

### Non-Migrants:

Non-migrant records can be identified where the origin state and county codes are the same as the destination state and county codes.

### Foreign Flows:

	State Abbrev.	State FIPS	County FIPS
Foreign - Overseas	FR	57	001
Foreign - Puerto Rico	FR	57	003
Foreign - APO/FPO ZIPs	FR	57	005
Foreign - Virgin Islands, U.S	FR	57	007

### County Total Migration Flows:

	State FIPS	County FIPS
[State County Name] Total Migration – US and Foreign	96	000
[State County Name] Total Migration – US	97	000
[State County Name] Total Migration – Same State	97	001
[State County Name] Total Migration – Different State	97	003
[State County Name] Total Migration – Foreign	98	000

### Other Flows:

	State Abbrev.	State FIPS	County FIPS
Other Flows - Same State	SS	58	000
Other Flows - Different State	DS	59	000
Other Flows - Northeast	DS	59	001
Other Flows - Midwest	DS	59	003
Other Flows - South	DS	59	005
Other Flows - West	DS	59	007
Foreign - Other flows	FR	57	009

### Northeast Region (59-001)

Connecticut (09-000)  
 Maine (23-000)  
 Massachusetts (25-000)  
 New Hampshire (33-000)  
 New Jersey (34-000)  
 New York (36-000)  
 Pennsylvania (42-000)  
 Rhode Island (44-000)  
 Vermont (50-000)

### Midwest Region (59-003)

Illinois (17-000)      Ohio (39-000)  
 Indiana (18-000)      South Dakota (46-000)  
 Iowa (19-000)      Wisconsin (55-000)  
 Kansas (20-000)  
 Michigan (26-000)  
 Minnesota (27-000)  
 Missouri (29-000)  
 Nebraska (31-000)  
 North Dakota (38-000)

**South Region (59-005)**

Alabama (01-000)  
Arkansas (05-000)  
Delaware (10-000)  
D.C. (11-000)  
Florida (12-000)  
Georgia (13-000)  
Kentucky (21-000)  
Louisiana (22-000)  
Maryland (24-000)  
Mississippi (28-000)  
North Carolina (37-000)  
Oklahoma (40-000)  
South Carolina (45-000)  
Tennessee (47-000)  
Texas (48-000)  
Virginia (51-000)  
West Virginia (54-000)

**West Region (59-007)**

Alaska (02-000)  
Arizona (04-000)  
California (06-000)  
Colorado (08-000)  
Hawaii (15-000)  
Idaho (16-000)  
Montana (30-000)  
Nevada (32-000)  
New Mexico (35-000)  
Oregon (41-000)  
Utah (49-000)  
Washington (53-000)  
Wyoming (56-000)

**F. Appendix 1**

**Table 1: Counties with a Net Change Greater than 100 Returns by Absolute Value of the Net Percentage Change, based on the 2019 and 2020 ZIP Code-to-County Codebooks**

State	County FIPS code	County name	Net percentage change
LA	023	Cameron Parish	-5.16
VA	685	Manassas Park city	-2.86
MO	223	Wayne County	2.59
TX	325	Medina County	1.97
NC	003	Alexander County	1.95
GA	207	Monroe County	-1.78
KY	121	Knox County	1.58
MS	073	Lamar County	1.55
MS	153	Wayne County	1.44
KS	061	Geary County	1.32
WI	015	Calumet County	1.27
MS	035	Forrest County	-1.26
LA	053	Jefferson Davis Parish	1.26
TX	187	Guadalupe County	1.24
VA	600	Fairfax city	-1.10
TX	091	Comal County	-1.07
TX	007	Aransas County	-1.05
TX	185	Grimes County	0.99
AL	083	Limestone County	-0.95
KY	125	Laurel County	-0.91
GA	029	Bryan County	-0.90
KS	161	Riley County	-0.88
NC	037	Chatham County	0.88
TN	089	Jefferson County	-0.87
VA	075	Goochland County	0.85
MI	089	Leelanau County	0.84
GA	117	Forsyth County	0.83

## **H. Endnotes:**

[1] Totals from the migration data may not be comparable to other totals published by SOI because the migration data are based on individual returns and tax return filers that can be matched to two consecutive calendar years. Most of SOI's individual income tax tabulations are based on returns from only one calendar year.

[2] The State and County Federal Information Processing System (FIPS) codes used for these statistics were derived from the U.S. Census Bureau. A complete list of codes can be obtained from <http://www.census.gov/geo/reference/ansi.html>.

[3] Individuals can apply to the IRS for an Individual Taxpayer Identification Number (ITIN) for the purpose of filing a valid U.S. Federal income tax return. An ITIN is a special nine-digit tax processing number, beginning with the number "9". There are some instances where an individual will receive a valid Social Security Number (SSN) in place of their ITIN and must file their individual return using the SSN. Returns that switch between an ITIN and a SSN between two migration years will not be included in the data because of the non-matching TINs.

A non-matching return can also occur if a taxpayer filed a return in one year, but not timely file in the other year or did not file at all. Individuals may not be obligated to file a tax return if their income fell below the filing threshold in a given year.

[4] The foreign category is derived from records with Puerto Rico, the U.S. Virgin Islands, foreign countries, or APO/FPO addresses. APO refers to Army Post Office and FPO refers to Fleet Post Office, part of the Overseas Military Mail System that is responsible for transferring mail to- and from- these overseas locations through military ZIP Codes.

[5] The Gross Migration file is for all 50 states, plus the District of Columbia (DC). A separate category for "Other areas", such as returns filed from Army Post Office and Fleet Post Office addresses by members of the armed forces stationed overseas; returns filed by other U.S. citizens abroad; and returns filed by residents of Puerto Rico with income from sources outside Puerto Rico or with income earned as U.S. government employees; have not been included.

[6] The total number of matched returns is derived from the year 2 number of returns. The total number of matched returns is also equal to the sum of the number of non-migrant returns, the number of inflow returns, and the number of same state returns.

Same state returns are those who migrated to another county within the same state.
